

Module Maker for Online Learning

By Dr. Jamie McKenzie

<http://questioning.org/module/module.html>

Task 1

Dr. McKenzie says, "As long as schools are about teaching rather than learning, there is little need for expanded information capabilities."

Discuss with your group what he means.

Task 2

Visit Dr. McKenzie's Module Maker then develop research questions for a classroom project by asking students to answer prime questions when they research:

Why? (Analysis: Why do things happen the way that they do?)

How? (Problem Solving: How could things be made better?)

Which? (Decision Making: Which do I select?)

Select a topic that your students will be studying:

Topic: _____

Create questions you want your students to answer that will use higher level thinking:

1. _____

2. _____

3. _____

4. _____

5. _____

Have your students use these questions as a beginning point for creating research strategies on your topic.
